

Taking Back Your Life: A Caregiver's Guide

Helping Family Caregivers Find Freedom in The Midst of Overwhelm

The Book

The Why

EXCERPT: "Whether or not you choose to make a change in your attitude or behavior, you will feel stress. Which stress will you choose: the same old, same old or the stress of doing something new and different? As you go through this book, your awareness of your needs will increase along with your desire for something different."

Change is inevitable. You are dealing with someone in need of care; their health is compromised. Whether age-related, chronic illness or another kind of debilitating illness, changes are going to happen, and this book is about the ability to make changes that will best take care of you as you continue to love and care for those in your life."

The Keynote

This presentation is relevant for your audience if they say "yes" to 3 or more of the following:

- Are you tired of doing everything for everyone else with no time left for yourself?
- Are you sick of telling others you are "fine" when you know you aren't?
- Are you done with "same old stuff, different day?"
- Do you wish you could learn simple solutions for setting better boundaries?
- Would you feel happier and freer if you never again did something purely out of guilt?
- Would it help you to focus on your needs for a change, to be clearer on what you really want, then master effective new strategies for having more of that in your life?

The Speaker

Loren Gelberg-Goff, MSW, LCSW, CHt, is founder and CEO of Well Within and a gifted psychotherapist, author and speaker who has been in private practice for over 35 years.

She is best known for creating the popular, life-changing program for caregivers: her 5-month virtual group program, "Take Back Your Life: The Art of Self-Care."

In her presentations and her work with clients she guides caregivers to be empowered so that they can live free of chronic, daily anxiety and overwhelm, and no longer feel constantly guilty, angry, or resentful.

Loren's mission is to guide, support, and encourage family caregivers to finally, and consistently take as good care of themselves as they do of the others in their lives.

Loren's clients report that, as a result of their relationship with Loren, they are able to live their lives more fully and with a renewed sense of inner peace and wellness.
